

Peracetic Acid Test Kit & Test Strips

Peracetic Acid Kit

Order Code 7191-02

The 7191-02 is a dropper bottle titration kit for hydrogen peroxide and peracetic acid. The hydrogen peroxide equivalence is 1 drop = 50 ppm. The peracetic acid equivalence can be modified to test different concentrations by using a different sample size. This results in a 1 drop = 6, 15, or 300 ppm equivalence.

A kit that determines only peracetic acid is available from our distributors. Please call 1-800-344-3100 for more information.

Test Strips

The Insta-Test 3000 test strips determine peracetic acid concentrations from 0-160 ppm. The test has a 10 second development time. The container has a desiccant liner and tight snap-cap to protect from moisture. Low and high range strips are also available.

Order Code 3000

10, 20, 40, 60, 85, 160 ppm Peracetic Acid

Order Code 3000LR

0, 5, 10, 20, 30, 50 ppm Peracetic Acid

Order Code 3000HR

0, 50, 100, 250, 500, 1000 ppm Peracetic Acid

Chlorine Dioxide Test Kits & Test Strips

Chlorine Dioxide Kits

Chlorine Dioxide reacts with DPD to form a pink color. Glycine is added in the test to remove chlorine interference. We offer a comparator kit and two 1200 meter kits, each packaged in a sturdy case with all reagents and apparatus.

Order Code 3671-01 DPD Tablet reagent version

Order Code 3671-01-LI DPD Liquid reagent version
0-7.0 ppm, Detection Limit = 0.05 ppm

Order Code 3622-01

0-5 or 0-10 ppm [0, 0.2, 0.6, 0.8, 1.0, 2.0, 3.0, 5.0] 0-10 by dilution

Test Strips

Order Code 2999 LR
[0, 0.25, 0.5, 1, 3, 5, 10 ppm]

Order Code 3002
[0, 10, 25, 50, 100, 250, 500 ppm]
