

IT Support Specialist / Systems Administrator

Grow Your IT Career in a Multi-Technology Environment

Are you an experienced IT professional looking to expand your expertise across **networking, security, virtualization, and system administration**? We're seeking a **versatile IT Support Specialist / Systems Administrator** who can provide **advanced desktop support**, work with **virtualization technologies**, and manage **network infrastructure**. This role offers exposure to a wide range of technologies, making it an excellent opportunity for someone eager to deepen their skills in a **dynamic and fast-paced** environment.

What You'll Do:

- Provide **advanced desktop support** and troubleshoot complex hardware/software issues.
- Manage and support **Active Directory, Windows OS, and various Linux distributions**.
- Work with **virtualization platforms and hypervisors** to maintain IT infrastructure.
- Configure and maintain **firewalls, routers, and switches**.
- Support **SIEM solutions** and security monitoring tools.
- Collaborate with **VARs and external vendors** to ensure projects are completed efficiently.
- Oversee **printers, networked devices, and office technology**, ensuring smooth operations.
- Take ownership of IT tasks and proactively improve system performance and security.

What We're Looking For:

- **2+ years of IT support experience** in a multi-technology environment.
- Strong troubleshooting and problem-solving skills across **hardware, software, and networks**.
- Experience with **Active Directory, Windows OS, and Linux administration**.
- Familiarity with **virtualization technologies (ProxMox,VMware, etc.)**.
- Knowledge of **network security principles, firewalls, routers, and switches**.
- Ability to manage multiple tasks, meet deadlines, and work with vendors to implement solutions.
- Strong communication skills and ability to work independently and within a team.
- Certifications (CompTIA Network+, Security+, Microsoft, Cisco, or equivalent) are a plus.

Why Join Us?

- **Diverse IT environment** with hands-on exposure to networking, security, virtualization, and system administration.
- Opportunities for **career growth and development**, including certifications.
- Work with **a variety of technologies**, keeping your skills sharp and relevant.
- A dynamic team environment where **problem-solvers thrive**.
