Plastics properties &

Introduction

The Dynalon® catalog technical section aims to provide clear, concise information about the key polymers from which our ranges are manufactured. It is intended as your guide to the suitability of our products for use with a variety of chemical groups, and in a variety of environments.

Each polymer has its own entry with detailed technical information and a summary icon denoting its general chemical suitability characteristics. Those Polymers capable of being repeatedly Autoclaved at, at least 121°C for 30 minutes are denoted by the letter A, more detailed temperature resistance is often included in the text.

The information within this section is designed to answer most common application questions but like any guide will not answer all. Dynalon's Technical Department will be pleased to answer any question relating to product usage.

LDPE (Low Density Polyethylene)

- Translucent naturally flexible polymer
- Temperature range of -50 to +80°C
- Not autoclavable
- Good to excellent chemical resistance
- Robust and virtually unbreakable
- Used for wash bottles, storage bottles, transfer pipettes, vials

Excellent resistance (no attack) to dilute and concentrated Acids, Alcohols, Bases and Esters.

Good resistance (minor attack) to Aldehydes, Ketones and Vegetable Oils.

Limited resistance (moderate attack) suitable for short term use only) to Aliphatic and Aromatic Hydrocarbons, Mineral Oils and Oxidizing Agents.

Poor resistance and not recommended for use with Halogenated Hydrocarbons.

quick facts

Maximum Temperature: 176°F (80°C)

Minimum Temperature: -58°F (-50°C)

Autoclavable: No

UV Resistance: Poor

Translucent with Excellent flexibility

Recycling Code: 4

LDPE

HDPE (High Density Polyethylene)

- Translucent rigid polymer
- Temperature range of -100 to +120°C
- Not autoclavable
- Good to excellent chemical resistance
- High impact resistance
- Used for storage bottles, containers and jars

Excellent resistance (no attack) to dilute and concentrated Acids, Alcohols and Bases.

Good resistance (minor attack) to Aldehydes, Esters, Aliphatic and Aromatic Hydrocarbons, Ketones and Mineral and Vegetable Oils.

Limited resistance (moderate attack) and suitable for short term use only) to Halogenated Hydrocarbons and Oxidizing Agents.

quick facts

Maximum Temperature: 248°F (120°C)

Minimum Temperature: -148°F (-100°C)

Autoclavable: No

UV Resistance: Poor

Translucent and Rigid

Recycling Code: 2

HDPE

chemical resistance

PP (Polypropylene)

- Translucent rigid polymer
- Temperature range 0 to +135°C
- Autoclavable (repeatedly)
- Good to excellent chemical resistance
- Impact resistant
- Used for beakers, bottles, cylinders and screw closures

Excellent resistance (no attack) to most Acid solutions, Alcohols, Bases and Mineral Oils.

Good resistance (minor attack) to Aldehydes, Esters, Aliphatic Hydrocarbons, Ketones & Vegetable Oils.

Limited resistance (moderate attack) and suitable for short term use only) to Aromatic and Halogenated Hydrocarbons and Oxidizing Agents.

quick facts

Maximum Temperature: 275°F (135°C)

Minimum Temperature: 32°F (0°C)

Autoclavable: Yes

UV Resistance: Poor

Translucent and Rigid

Recycling Code: 5

PP

PMP (Polymethylpentene)

- Transparent rigid polymer
- Temperature range 0 to +145°C
- Autoclavable
- Good to excellent chemical resistance
- Glass like clarity
- Used for transparent beakers and cylinders

Excellent resistance (no attack) to dilute and concentrated Acids, Alcohols, Bases and Mineral Oils.

Good resistance (minor attack) to Aldehydes, Esters, and Vegetable Oils.

Limited resistance (moderate attack) and suitable for short term use only) to Aliphatic and Aromatic Hydrocarbons, Ketones and Oxidizing Agents.

Poor resistance not recommended for use with Halogenated Hydrocarbons.

quick facts

Maximum Temperature: 293°F (145°C)

Minimum Temperature: 32°F (0°C)

Autoclavable: Yes

UV Resistance: Poor

Clear and Rigid

Recycling Code: 7

PMP

PS (Polystyrene)

- Transparent rigid polymer
- Temperature range -10 to +70°C
- Not autoclavable
- Moderate chemical resistance
- Brittle yet has excellent clarity
- Used for petri dishes, pipettes and container ware

Excellent resistance (no attack) to dilute Acids, Alcohols and Mineral Oils.

Good resistance (minor attack) to Vegetable Oils.

Limited resistance (moderate attack) and suitable for short term use only) to concentrated Acids.

Poor resistance not recommended for use with Aldehydes, Esters, Aliphatic, Aromatic and Halogenated Hydrocarbons, Ketones and Oxidizing Agents.

quick facts

Maximum Temperature: 158°F (70°C)

Minimum Temperature: 32°F (0°C)

Autoclavable: No

UV Resistance: Good

Clear and Rigid

Recycling Code: 6

PS

Key to Summary Icons

These 'Summary Icons' are intended to give a quick guide to the chemical resistance of the polymers.

Exceptional resistance to almost all laboratory chemicals.

Good to excellent chemical resistance across a broad range of common laboratory chemicals.

Moderate to good resistance to common aqueous laboratory chemicals but avoid organic solvents and strong acids and bases.

Autoclavable.

Note: Where no icon is shown product is manufactured from several materials, refer to text for component's resistance.

Reference to methods of sterilization are based on the following standards:

Autoclaving 121°C, 15 psi for 30 minutes.

When autoclaving always ensure caps are loosened or removed to prevent accidental implosion. Certain chemicals which have no appreciable effect on resins at room temperature may cause deterioration at autoclaving temperatures unless removed with distilled water before hand.

Gas-Ethylene oxide formaldehyde.

Dry heat 160°C, 120 minutes.

Disinfectants - Benzalkonium chloride, formalin, ethanol, etc.

Radiation - gamma irradiation at 2.5 (Mrad) with unstabilized plastic.

Note: Sterilizing reduces the mechanical strength of certain polymers.

Low Density Polyethylene (LDPE)

The first of the polyolefins originally prepared some fifty years ago by the high pressure polymerization of ethylene. Its comparatively low density arises from the presence of a small amount of branching in the chain (on about 2% of the carbon atoms). This gives a more open structure. LDPE is a most useful and widely used plastic. It is translucent to opaque, robust enough to be virtually unbreakable and at the same time quite flexible. Chemically LDPE is unreactive at room temperature although it is slowly attacked by strong oxidizing agents and some solvents will cause softening or swelling. It may be used at temperatures up to 95°C for short periods and at 80°C continuously. LDPE is ideally suited for a wide range of laboratory apparatus including wash bottles, pipette washing equipment and tanks.

High Density Polyethylene (HDPE)

A linear polymer prepared from ethylene by a catalytic process. The absence of branching results in a more closely packed structure with a higher density and somewhat higher chemical resistance than LDPE. It is also somewhat harder and more opaque and it can withstand rather higher temperatures (120°C for short periods, 110°C continuously). It lends itself particularly well to blow moulding, e.g. for bottles and containers.

Polypropylene (PP)

A polymer prepared catalytically from propylene which differs from HDPE by having an isotactic replacement of a hydrogen atom by a methyl group on alternate carbon atoms in the main chain. Although largely unreactive chemically the presence of the methyl groups makes it slightly more susceptible to attack by strong oxidizing agents than HDPE. A major advantage is its higher temperature resistance. It makes it particularly suitable for items such as trays and instrument jars that have to be sterilized frequently for use in a clinical environment. PP is a translucent material with excellent mechanical properties and it has gradually replaced the polyethylenes for many purposes.

A

Polymethylpentene (PMP or 'TPX'*)

A polymer of 4-methylpentene-1 which is similar to PP but has an isobutyl group in place of methyl group on alternate C atoms. The important qualities of PMP ("TPX") as a laboratory plastic are its high transparency, its rigidity and resistance to impact and its ability to withstand temperatures of up to 180°C for short periods (145°C continuously). It is particularly suitable for volumeetric apparatus such as flasks, measuring cylinders and beakers. Like other polyolefins PMP ("TPX") is susceptible to attack by strong oxidizing agents over a period of time and some chlorinated solvents (e.g. trichloroethylene) can cause some softening and swelling. *"TPX" is a trademark of Mitsui Petrochemicals Ltd.

A

Polyvinylchloride (PVC)

PVC has a linear structure similar to polyethylene but with a chlorine atom replacing a hydrogen atom on alternate carbon atoms. PVC itself is hard and rigid but the addition of phthalate esters as plasticizers makes it soft and pliable and ideal for tubing. The material is generally transparent with a bluish tint. It is attacked by many organic solvents but it has a very good resistance to oils and it has a low permeability to gases. In its rigid form PVC is available in sheets which can readily be welded to produce tanks, trays and troughs. It is not recommended for use above 70°C although it can be taken to 80°C for short periods.

Polycarbonate (PC)

PC is a linear polycarbonic acid ester prepared from a dihydric phenol. It possesses extraordinarily good dimensional stability with a high impact strength which is maintained over a wide temperature range. This makes it ideal for the manufacture of laboratory safety shields, vacuum desiccators and centrifuge tubes. PC may be autoclaved (maximum continuous working temperature 130°C, and 140°C for short periods), but some loss in mechanical strength occurs on repeated autoclaving and the equipment should not then be used for vacuum applications. The carbonate linkages in the chain make the material subject to reaction with a variety of concentrated acids and bases and it is soluble in various organic solvents.

143354 Zebrafish Series

Polystyrene (PS)

A hard rigid, transparent plastic with good dimensional stability. The material has good chemical resistance to many aqueous solutions but it is soluble in many aromatic and halogenated solvents. It cannot be used at elevated temperatures (maximum 60°C continuous, 70°C for short periods) and it tends to suffer from mechanical stress. It finds a wide use in disposable laboratory products. The chemical resistance to non-polar solvents and aromatics can be improved by co-polymerizing styrene with acrylonitrile (CH₂=CH-CN). The resultant product SAN usually contains 25-35% of acrylonitrile by weight. SAN also has an improved impact strength and rigidity and is much used for injection molded articles such as boxes and food containers. An acrylonitrile-butadiene-styrene (ABS) graft copolymer is obtained by polymerizing acrylonitrile and styrene in the presence of soluble polybutadiene [(CH₂-CH=CH-2)_n]. The physical properties of the product may be varied by changing the individual proportions. The polymer has a higher chemical resistance than PS and it will retain its stability of shape up to 100°C.

Polymethylmethacrylate (ACRYLIC)

A rigid plastic with a high degree of transparency. It is resistant to inorganic acids and alkalis but is attacked by a wide range of organic solvents. Its clarity and stability make it very suitable for the manufacture of burets and in sheet form it may be cemented to produce tanks, trays, etc. ACRYLIC may be used at temperatures up to 70°C continuously and to 90°C for short periods. 10mm thick Acrylic provides an effective barrier to Beta radiation.

Polytetrafluoroethylene (PTFE)

PTFE shows a remarkable chemical resistance and it is insoluble in all known solvents. It is attacked only by molten alkali metals and by fluorine at high temperatures. PTFE is incombustible and may be used up to 260°C (300°C for short periods). Its coefficient of friction is extremely low and it shows the effect of self lubrication with constant mechanical properties which makes it particularly suitable for bearings, joints, O-rings, stirring bars, etc. It may be shaped by compression and sintering into bottles and beakers where its chemical stability and non-wettability make it suitable for use in extreme circumstances.

Perfluoroalkoxy PTFE (PFA)

PFA is a copolymer of tetrafluoroethylene (CF₂=CF₂) with a perfluoroalkyl vinyl ether [F(CF₂)_mCF₂OCF=CF₂]. The resultant polymer contains the carbon-fluorine backbone chain typical of PTFE with perfluoroalkoxy side chains. The mechanical, chemical and physical properties are fundamentally attributable to the main chain and the chief effect of the side chains is to control the crystallinity of the polymer. Unlike PTFE the new polymer does not require special fabricating techniques. It has outstanding chemical and solvent resistance over a temperature range even greater than PTFE (p.e. -270° to +260°C). PFA has extremely low absorption and permeability levels even at 200°C which make it very suitable for trace element analysis, isotopic separations, sample digestions and the handling of sensitive biological solutions. The material is translucent but liquid levels can easily be seen. In short PFA approximates closely (and in some cases exceeds) the overall properties of PTFE while offering the flexibility of thermoplastic processing. FEP exhibits similar properties but is also susceptible to attack by concentrated perchloric acid.

Synthetic rubbers and other O-ring and gasket materials

Synthetic rubbers are based mainly on polymers and co-polymers of butadiene and its derivatives.

Neoprene: A polymer of chloroprene (2-chlorobutadiene) i.e. CH₂=CH-CCl=CH₂. This material has a better oil resistance than natural rubber. The presence of chlorine deactivates the C-C bond and makes it less susceptible to oxidative attack as well as increasing its resistance to solvents. It has a higher temperature and fire resistance than natural rubber.

Nitrile Rubber: A co-polymer of acrylonitrile (CH₂=CHCN) and butadiene, (CH₂=CH-CH=CH₂). It has a good solvent resistance increasing with increasing acrylonitrile. Good for gaskets, oil and petrol hoses.

Viton A: A co-polymer of perfluoropropene (CF₃CF=CF₂) and vinylidene fluoride (CH₂=CF₂). It is resistant to chemical and solvents up to 200°C and is used for O-rings, gaskets and hose linings.

The information contained within this catalog is offered for use by technically qualified personnel at their discretion and risk. All technical statements, information and recommendations contained herein are based on tests and data we believe to be reliable, but the accuracy or completeness thereof is not guaranteed and no warranty of any kind is made with respect thereto. We recommend that users satisfy themselves as to the compatibility between contents and containers or substances and apparatus before use. Dimensions given throughout this catalog are nominal unless otherwise stated. Heavy Duty Sample Bags - Zipper Seal LDPE

These heavyweight (4 mil & 2 mil) polyethylene bags are ideal for collecting, storing and protecting laboratory specimens and samples easily and conveniently. Sealed bags keep dust out. Not suggested for use with liquids. Many uses in the lab and industry. Bags lock easily and securely with the zipper locking feature. No printing on the bag allows easier labeling and marking.

Ties Coated LDPE

Ties are extruded of bright red LDPE bonded to an annealed steel wire on a 4000' spool. Can be cut to any size.

626814 \$123.77 each

Baritainer® Jerry Cans

- Replaces fluorinated, glass, steel and epoxy phenolic
- UN Classification X Rated (4-10L) Y Rated (13-20L)
- Impact and corrosion resistant
- Durable, lightweight, stackable
- FDA Compliant
- Economical and Recyclable

Baritainer® Jerry Cans with handle (4L, 5L, 10L 13L & 20L) from Dynalon are the alternative solution for packaging, storing & transporting chemicals that usually require glass, metal, fluorinated HDPE or other single barrier containers.

Baritainers are impact resistant, lightweight, rugged, economical & stackable containers for chemicals. Baritainers are effective containers for solvents, esters, ketones and some acids.

522085 Polypropylene Series

Azlon

522095 Polymethylpentene Series

“Square Ratio” Design Printed Polypropylene and Polymethylpentene Beakers

- Shatter resistant - reduce breakage & incidence of injury!
- Chemically resistant to most acids, bases and many common solvents
- Autoclavable
- Choose glass-like clarity of polymethylpentene (PMP) or
- Choose economical translucent polypropylene (PP)

Square ratio beakers are the safe, convenient alternative to griffin style beakers. These beakers feature a vertical lip around the top of the beaker which serves two purposes: first the lip contains many spills that may occur with the rounded design of a griffin style beaker. Second, this vertical lip allows the beakers to be stacked together in sets when not in use. Maximum temperature for PP is 135°C; PMP is 150°C to 180°C for short intervals.

522055 Polypropylene Series

522765 Polymethylpentene Series

Azlon

Tapered Low-Form Polypropylene & Polymethylpentene Beakers

- Shatter resistant - reduce breakage & incidence of injury!
- Chemically resistant to most acids, bases and many common solvents
- Beakers are not calibrated
- Autoclavable
- Choose glass-like clarity of polymethylpentene (PMP) or
- Choose economical translucent polypropylene (PP)
- Comply with ISO7056

Smoothly tapered Azlon beakers made from virgin, high clarity polypropylene or transparent polymethylpentene. Available with both molded and easy to read blue printed graduations. This extensive range of beakers from 25ml to 5 liters is break resistant and durable. Also supplied with an anti-lock feature that prevents beakers from sticking together when stacked. Tapered design allows for easy handling. SPI recycling codes and batch stamped for full traceability. Maximum temperature for PP is 121°C; PMP is 180°C.

Beakers PTFE

- Optional watch glass available
- Not graduated

Isostatically molded from virgin PTFE and machine finished to give a smooth surface for ease of cleaning and to eliminate contamination. Beakers with pouring spouts are virtually immune to chemical attack, only attacked by some fluorine containing compounds at very high temperature and molten alkalis metals. Working temperature range is from cryogenic to 260°C.

222075 Polypropylene Series

222045 Polymethylpentene Series

Kartell

Griffin Style Beakers - Comply with ISO 7056

- Special no-drip pouring spout
- Chemically resistant to most acids, bases and many common solvents
- Shatter resistant - reduce breakage & incidence of injury!
- Autoclavable

For general laboratory use. Polypropylene beakers will withstand temperatures up to 135°C and polymethylpentene beakers can withstand temperatures as high as 180°C for short intervals. Graduations molded in milliliters. Conforms to ISO7056.

Liquid Waste Storage Box, Enclosed Model

Similar to Catalog Number 172085 above, but taller to hold the included bottle and funnel inside the unit. Hinged cover. Supplied with non-skid feet, jug and funnel. Unit measures 6 1/2" L x 6 1/2" W x 18 1/2" H ID. Additional sizes available upon request.

172095 Liquid Waste Box, Enclosed Model \$309.74 each

Beta Storage Cabinet

- Locking
- Four adjustable shelves
- Leveling feet
- Beta warning stickers

Locking beta storage cabinet is available with four adjustable shelves allowing for secure storage of your beta samples. Cabinet features space saver design to fit nicely on most bench tops. Shelves are sized to accommodate racks, bottles, boxes, etc... Unit has four adjustable leveling feet and safety lock. Supplied with radiation hazard stickers. Dimensions: 12" L x 30" W x 24" H. Additional sizes available upon request.

172034 Beta Storage Cabinet \$654.24 each

Important - Cleaning Note

Should the acrylic surfaces of acrylic products need cleaning, DO NOT USE ANY SOLVENTS OR ABRASIVES (alcohol, acetone, etc...)

USE OF THESE MATERIALS WILL CAUSE CRACKING OR CRAZING OF THE ACRYLIC.

For general cleaning wash the surface with a mild detergent and soft cloth, then rinse thoroughly with clean water.

Bench Top Beta Shields

- High quality shields in 3/8 inch Acrylic protect against beta radiation
- Angles allow comfortable ergonomic working position when examining or handling samples
- Excellent demonstration shield
- Biohazard shield for blood-born pathogens

Bench top shields are designed with the safety of the user in mind. The top is angled and wide to protect the face and body. Like our popular Splash Shield, the user can easily place his / her arms around the shields to perform any number of procedures while still protecting the operator. Additional sizes available upon request.

All Beta Protection Products are fabricated in our Rochester, New York facility and can be customized to your special requirements.

Bench Top Splash and Beta Shields

- No eye-level distortion
- Extra wide top
- Non-skid feet
- Beta warning stickers

Lower bend and wider top gives greater visibility of work surface and assures greater protection from splashes to face and neck area. The Splash Shield has been designed to be used comfortably either from a standing or sitting position. The gentle bend from the base allows the technician to observe the working surface from a comfortable sitting position. The lower area of the Shield is just 12" wide, thus making it easy to reach behind the Shield to pipette, open vials or perform any number of functions, while protecting the operator from being accidentally splashed. Fabricated from 3/8" clear acrylic for excellent stability. Non-skid feet. Measurements: base—20" W x 12" D; face area—20" W x 15" H; overall— 20" W x 12" D x 20" H. Additional sizes available upon request.

Dispensing Bottles with Nozzle LDPE

- Leakproof screw closure
- Flexible

Azlon

The white polyethylene screw cap has a pivoting nozzle which can be raised to give a direct jet of liquid as the bottle is squeezed. When the nozzle is closed the passage for liquid is shut off to give an airtight seal at normal pressure, although when the nozzle is partly open it makes an excellent dropping device. Max. temperature for LDPE is 80°C.

NEW Flip & Spray™ Bottle PE/PP
The spray bottle that even works upside down!

- Uninterrupted spraying
- Parts in contact with media made of PP, PE, silicon and stainless steel
- Nozzle diameter 0.6 mm and continuously adjustable
- Amount sprayed per stroke: 1.2 ml ± 0.1

These unique 250, 500 and 1000mL reusable polyethylene Spray Bottles with a polypropylene sprayer have excellent chemical resistance and will perform upright or inverted. The limber silicone tubing attached to a stainless steel weight with a PP filter remains immersed in the liquid in the upside down position and allows the product to work. This unique feature lets a user spray conveniently from any direction while reaching many inaccessible areas. Adjust the spray knob to obtain a fine mist to a steady stream.

Dispenser Bottle w/ Adjustable Volume LDPE/PMP

The graduated clear PMP measuring cup slides up and down on the vertical polyethylene tube for easy adjustment. The variation in height determines the volume to be dispensed. The cup is filled by squeezing the LDPE bottle and forcing the liquid up the tube. When the bottle pressure is released, the excess will be drawn back into the bottle and only the desired volume will remain.

Narrow Mouth Graduated Grey Bottles, PE

Kartell

- PE bottles with PP closures
- Plug and seal cap

These opaque leakproof bottles are excellent for storing light sensitive materials, either liquid or solid. Body in Polyethylene (PE); cap in Polypropylene (PP). A LDPE neck insert plug provides maximum security. The easy grip PP screw closure contains tag holes and may be wired securely to either of 2 shoulder holes. Sloping shoulders reduce any possibility of residue deposits. Suitable for food grade products.

Polycarbonate Graduated Media Bottles with Polypropylene Closure

- Octagonal square shape for easy pouring and space storage
- Graduation markings are optically clear molded-in
- Transparent and autoclavable
- Leak-proof

Unequaled in design or performance, the octagonal square shape provides an "Easy-Grip" for pouring. Transparent and autoclavable. Use with aqueous solutions, storage of media-short term or for space saving (square) storage. The cap is made with virgin, high-temperature polypropylene (PP) and is liner-free and comes with a leak-proof guaranty. The neck ring insures security of shrink-wrapped seals and has a smooth interior so there is no fluid entrapment and no back-flow contamination. The seal ring is molded inside the cap and fits tightly against the bottle neck; insuring a leak-proof system.

Bottle, Safety - Bottle, Square

Azlon

Round Concertina Bottle HDPE

- Collapsible, adjustable volume
- Ideal for photographic chemicals and hydrogen peroxide

These amber collapsible bottles are ideal for solutions that readily oxidize, or those that liberate gases. The bellows convolution of the walls allow the bottle volume to be adjusted to match the volume of contents and eliminate air space as liquid is drawn off or added.

	501835
Capacity ml	1000
Height mm	201
Diameter mm	100
Neck I.D. mm	32
Case Quantity	5
Case Price \$	33.64

Suitable for use with gas liberating solutions, e.g. hydrogen peroxide.

Narrow Mouth Bottles, HDPE with White Tamper-Evident HDPE Screw Closures

Kartell

The tamper-evident cap incorporates a safety ring which is secured when the cap is screwed on to the bottle. Opening the bottle breaks the safety ring, showing signs of interference.

Solvent Venting Wash Bottles

Azlon

- Wide mouth for easy filling
- Eliminates unwanted jets of solvent
- Dispenses solvents efficiently
- Eliminates solvent dripping

These LDPE Driplok Wash Bottles with PP closures feature the only venting system that dispenses solvent as efficiently as a standard wash bottle. This venting system consists of a valve specifically designed to allow volatile solvent vapors to escape, but seals completely when in use to dispense a powerful, spatter-free jet of solvent. These easy to fill bottles are available labeled with hazard information, or blank with write on for customization.

Round Wide Neck Printed Water Wash Bottles LDPE

These high quality wash bottles are supplied in flexible natural polyethylene and are fitted with leak proof, wide neck polypropylene spout closures. The wide neck offers easy spill-free filling, and the acute angled, precision molded dispensing spout, ensures a consistent, downward pointing jet. The wash bottles are supplied in shrink-wrapped packs of five. All feature S.P.I recycling codes on their base. Maximum temperature of LDPE is 80°C.

Biological Stain Bottle Kit

Azlon

Stain series Driplok venting wash bottles preprinted for five popular biological stains. Printed for Lugols Iodine Solution, Crystal Violet, Gram Color De-coloring Solution, Gram Iodine Solution and Safranin Solution. Printed information includes hazard warning symbols where relevant and instructions for use. Dark colored stain bottles are printed in light colors for easy recognition of contents. Consists of five assorted 250ml bottles labeled as above.

Bottle, Weigh - Bucket, Ice

Weighing Bottles PP with PP Lids

- Autoclavable, reusable translucent bottles
- Airtight, push on lids included
- No internal shoulder eliminates need for spatulas
- For liquids or solids

Reduce the tare weight correction with these light weight, autoclavable, reusable translucent bottles. Highly resistant to acid attack. Tops can be squeezed to assist pouring. Remove lid before autoclaving. Very economical compared to glass.

Hazardous Chemical Bottle Pourer

The hazardous and corrosive chemical pourer is manufactured fully from PTFE and has totally inert pouring surfaces, even the neck-sealing ring is encapsulated in PTFE. The unique design allows direct and controlled pouring due to the incorporated breather vent. The pourer comes in four sizes to fit standard reagent bottles with neck sizes of GL45, 38, 32 and 30. A captured PTFE closure ensures contaminant free contents when not in use. (Bottle not included.)

Titration Burette Automatic

This automatic titrating burette is a universal aid in the laboratory, electroplating industry, water treatment plants, for field analysis and numerous other applications. Available in 5 sizes from 5mL to 50mL. Prominent features include:

- Measured "to deliver"
- Burette made of Schott graduated borosilicate glass with blue ring graduations and Schellbach stripe for easy read measurements
- Graduations in accordance with Category B (Tolerances according to DIN ISO 385)

- Exact dispensing of precise discharge jet or drop via the micro screw
- Left or right hand operation for ease of use
- Sturdy stand for support
- 1 liter low density polyethylene (LDPE) chemically resistant bottle

Acrylic Burette

- Class B accuracy
- Ideal for use in educational environment
- Supplied with PMP/PP stopcocks
- Each burette supplied with technical data sheet

These break resistant transparent acrylic burettes are screen printed in black to Class B accuracy. They are suitable for use in education, research or industrial laboratories, especially where breakages often occur.

This series is unaffected by most dilute aqueous solutions (except ammonia and HF) but unsuitable for ethanol or organic solvents. Individually calibrated.

Baritainer® Jerry Cans

Baritainer® Jerry Cans with handle (4L, 5L, 10L and 20L) from Dynalon are the new alternative solution for packaging, storing & transporting chemicals that usually require glass, metal, fluorinated HDPE or other single barrier containers.

Baritainers are impact resistant, lightweight, rugged, economical & stackable containers for chemicals. Baritainers are effective containers for solvents, esters, ketones and some acids.

- Replaces fluorinated, glass, steel and epoxy phenolic
- Impact and corrosion resistant
- FDA Compliant

- UN Classification X Rated (4L, 5L, 10L) Y Rated (20L)
- Durable, lightweight, stackable
- Economical and Recyclable

EFFICACY:

- Solvents: up to 300x of HDPE
- Oxygen: up to 100x of HDPE
- Fluorinated: up to 2X more efficient barrier

COMPARED TO HDPE:

- Quoral BR is 100x more efficacious with hydrocarbon solvents
- Provides an excellent aroma barrier
- 2x to 5x improvement in O2 barrier performance

KEY APPLICATIONS:

QUORAL® (patent pending) based Baritainer Jerry Cans have been extensively tested both for efficacy and safety. They can be used to safely dispense, store and transport solvents such as household chemicals, industrial & laboratory chemicals and waste, cleaning solvents, adhesives, wood preservatives, automotive additives, chemicals in the agricultural, automotive photo chemical sector. Baritainers can be used to safely store and transport food ingredients, flavorings, edible oils, essential oils and other industry products such as cosmetics and fragrances. Baritainer Jerry Cans offer an attractive and environmentally friendly alternative to glass, metal containers, coextruded or fluorinated containers and other single-layer barrier containers, polyester and PVC containers.

SPECIFICATIONS:

UN X or UN Y rated Jerry Can with screw closure. Closure size: DIN 50 (4L, 5L, 10L) or Natural 70mm (20L) with tamper-evident system. HDPE maximum temperature: 248°F (120°C) and minimum temperature: -148°F (-100°C). Not autoclavable.

COMPOSITION:

Jerry Can: Natural, QUORAL® (pat. pend.) and HDPE
Screw cap: Black HDPE. Screw cap Inner liner: cross link polyethylene (4L, 5L, 10L) Natural HDPE with 3/4" NPT Center Reducer screw cap and EPDM liner (20L)

DQ Series DynaQube

Most economic device to replace the ice bucket.

An economical device that can take the place of an ice bucket! 2 year warranty.

The DynaQube keeps samples dry at low temperatures for long periods. Includes ceramic coated aluminum beads to accommodate various sample vials in a 75 x 75mm compartment.

5 Anodized Aluminum Blocks in 4 x 5 arrays are interchangeable and available as accessories to accommodate 0.2 to 2.0mL microtube vials.

There are two DynaQube models:

DQ-I, the analog device, maintains samples at 0°C.

DQ-II, with display and adjustable temperature setting maintains samples between 0°C and room temperature.

Temperature Range 0°C to 4°C with no adjustment (DQ-01-01);
room temperature to minus 5°C (DQ-01-02)

Temperature Accuracy . . . ±1°C for DQ-01-02

Cooling Technology Peltier

Power Supply Input 90-230V, output 12V, 5A, 60 W

NEW

NEW Straight-Side Containers PETE with White PP Closures

Transparent Straight-Side Containers of PETE (Polyethylene Terephthalate) with white polypropylene liner less screw closures. Store pastes, samples, powders, specimens etc. in industrial and lab applications. PETE is durable, shatterproof and has excellent gas barrier properties with H₂O, O₂ and CO₂. These jars may be used below freezing to a maximum of 70°C.

Container - Crucible

Disposable Specimen Containers, HDPE and PCO with LDPE Lids

- Choose either translucent or opaque containers
- Maximum temperature HDPE 110°C

Containers are HDPE except 8, 16, 32 oz natural and white, and 83 oz natural, which are PCO, a copolymer of Polypropylene and High Density Polyethylene. PCO offers a product with a higher temperature range while maintaining good impact strength. Recycling code is "5" for PP and the HDPE recycling code remains "2".

Both natural and white lids, all sizes, are made of LLDPE. Linear Low Density Polyethylene is tough like LDPE and a bit more rigid like HDPE, thereby allowing for a tight fitting lid. Recycling code is 4. Designed to simplify and standardize the handling and storage of specimens. The containers are inert and cannot be attacked by formaldehyde or weak acids or bases. Will resist freezing or boiling. They have long shelf lives and are easily disposable. Sturdy enough for reuse. Easy to store, requires little space. Price includes container with lid.

Highest Quality Disposable Cuvettes Available

Extra advantages only from Dynalon...The extra advantage from Dynalon cuvettes is superior optical and surface qualities at economical prices. Affording your laboratory the convenience of disposable cuvettes, without sacrificing accuracy or precision of standard cuvettes. Disposable means you save time with no cleaning required, plus the extra safety advantage of preventing cross contamination. Dynalon uses the most technologically advanced toolmaking process. This means reduced dimensional tolerances to ensure the lowest variation of extinction coefficient within the package.

Each cuvette features an impression number, use cuvettes with the same impression number for optimal precision between samples. Each case consists of cuvettes with the same impression number. Dust-Proof Scratch Resistant Packaging...All cuvettes feature stackable trays with covers of expanded polystyrene (CFC-free) to meet today's manufacturing pollution standards. Unique tray packaging is easy to store and protects optical surfaces from scratches.

SEE cuvettes on pages 44-45

Cuvette Specifications

Typical values for macro and semi-micro cuvettes. Measured with water at 20°C, against air (E=0).

Material	Polystyrene (PS) Polymethyl methacrylate (PMMA)
Filling Volume	Macro cuvette: minimum 2.5ml; maximum 4.5ml Semi-micro cuvette: minimum 1.5ml; maximum 3.0ml
Dimensions	Cuvette: 12.5 x 12.5 x 45mm, light path 10mm Windows: Macro 10 x 35mm Semi-Micro 5 x 23mm

PS cuvettes have a typical range of application from 340nm. Standard deviation at 360nm $\leq \pm 0.005$ extinction units. PMMA cuvettes have a typical range of application from 300nm. Standard deviation at 320nm $\leq \pm 0.004$ extinction units.

Cuvettes, Visible Range Semi-Micro, 1.5ml

These exceptionally fine quality polystyrene cuvettes are designed for assays throughout the 340nm to 750nm visible spectral range. A standard 1cm light path and recessed windows provide maximum light transmission. Scale down your assay volumes to save on costly reagents using these specially designed cuvettes that have a minimum filling volume of 1.2ml. Packaged 100 per covered tray, with 500 per case. Dimensions: 12.5 x 12.5 x 45mm. Windows: 5 x 23mm. Light Path: 10mm.

302205-0002 \$107.78 per case

Cuvettes, UV-VIS Range Semi-Micro, 1.5ml

Injection molded from a superior grade of methacrylate designed for accuracy throughout the VIS-UV spectral range from 285nm to 750nm. Excellent optical qualities

throughout the spectral range make these cuvettes perfect for scanning small volumes, enzyme rate reactions, and standard curve determinations. Packaged 100 per covered tray, with 500 per case.

302225-0002 \$121.41 per case

Cuvettes, Visible Range Macro, 4.5ml

These exceptionally fine quality polystyrene cuvettes are designed for assays throughout the 340nm to 750nm visible spectral range. These specially designed cuvettes handle up to 4.5ml total volume with minimum filling volume of 2.5ml and a maximum of 4.5ml. Molded arrow indicates the direction of transmission for optimal signal and reproducibility. Packaged 100 per covered tray, with 500 per case. Dimensions: 12.5 x 12.5 x 45mm. Window: 10 x 35mm. Light Path: 10mm.

302195-0002 \$104.19 per case

Cuvettes, UV-VIS Range Macro, 4.5ml

A superior grade of methacrylate provides an excellent degree of light transmission throughout the VIS-UV spectral range from 285nm to 750nm. These cuvettes are ideal

for scanning, enzyme rate reactions (with small delta absorbances), and standard curve determinations. These cuvettes have a minimum filling volume of 2.5ml and a maximum of 4.5ml. Packaged 100 per covered tray, with 500 per case.

302235-0002 \$143.16 per case

Cuvette sample packs available, phone 800-334-7585 to request one.

Cuvettes, 4 Clear Sides Macro 4.5ml

Designed specifically for fluorometry, this is an excellent choice for nephelometry and spectrophotometry. A negligible variation in absorbance between the 4 optical sides allows readings from any side. The polystyrene cuvettes are accurate in the 340nm to 750nm visible spectral range. The methacrylate cuvettes are accurate throughout the 285nm to 750nm VIS-UV spectral range. Standard 1cm light path. Packaged 100 per covered tray, with 500 per case. Note: 4 Clear-Sided Cuvettes not sorted by nest numbers.

202295 VIS Macro Cuvettes \$87.71 per case
202285 UV-VIS Macro Cuvettes \$115.77 per case

Kartell

UV-Cuvette Micro, UV-Transparent Cuvettes

- Specially designed for photometric determination of proteins, ssDNA, dsDNA, RNA and oligonucleotides in the UV range
- Ideally suited for measurements at 260 nm, 280 nm and in the visible range
- Standard 10 mm light path
- No need for cleaning, no associated risk of sample carryover or cross-contamination
- Sample volumes as small as 70 µl are sufficient
- 15 mm center height allows use without adapter in most commercial spectrophotometers: Amersham Biosciences, Analytik Jena, Biochrom, WPA, Eppendorf®, Perkin Elmer Instruments™, Techne, ThermoSpectronic, etc.

UV-transparent disposable cuvettes replace expensive, fragile quartz cuvettes and are excellent for DNA, RNA, and protein analysis between 220-900nm. Resistant to many aggressive solvents, they eliminate the tedious maintenance, cleaning, and contamination of quartz cuvettes. Packaged 100 per pack.

ISO 9001 Certified Graduated Cylinders PMP

- Accuracy is individually checked
- Complete with Certificate of Accuracy (25mL through 2L sizes)
- Safer, more economical than glass
- Shatter resistant - reduce breakage & incidence of injury!
- Chemically resistant to most acids, bases and many common solvents

Dynalon®, plastic, premium graduated cylinders are manufactured under strict control. Each cylinder is manually checked and marked with an “H” to confirm premium tolerance has been achieved. These cylinders are manufactured from virgin PMP (polymethylpentene) to provide window-clear transparency and outstanding chemical compatibility. PMP can be sterilized using all common methods including autoclaving*.

Safety first...Plastic cylinders will not shatter like glass. They are the ideal replacement for glass cylinders in production environments where broken glass would contaminate production, i.e. food and beverage production, pharmaceutical, chemical and semiconductor industries. Replacement costs due to breakage are also greatly reduced. Each cylinder (except the 10mL) is supplied complete with certificate. *Repeated autoclaving will affect accuracy.

Printed Cylinders PP & PMP

- Brilliant easy to read blue printed graduations
- Shatter resistant - reduce breakage & incidence of injury!
- Chemically resistant to most acids, bases and many common solvents
- Autoclavable
- Choose glass-like clarity of polymethylpentene (PMP) or
- Choose economical translucent polypropylene (PP)

These cylinders feature permanently easy to read blue screened graduations that resist fading and scratching after repeated autoclaving. Meets stringent international quality criteria according to ISO 6706 standards. Tolerances according to DIN 12 680 TT, Class B. Maximum temperature: PP 121°C, PMP 135°C

Hydrometer Jar - Cylinder PP

Translucent polypropylene 500 ml cylinder with overflow cup. Molded graduations. Overall dimensions: 1" I.D. x 12" high (38 x 305mm). Base is 4 1/4" (108 mm) in diameter. Additional sizes upon request.

141805 \$48.24 each

SEE Slip-Stop anti-slip matting on page 67

Cylinder, Squat - Delivery Tube

Cylinders, Squat Form, Polypropylene

- Squat design for increased stability on the bench and ease of handling particularly in restricted spaces
- Self-draining base eliminates water collection during washing in an automatic lab washing machine - thereby removing all spill re-wetting and contamination issues
- Clear molded blue over-printed graduations - always visible
- High clarity polypropylene - safe, unbreakable with good chemical and temperature resistance
- Anti suction base - no problems when working on wet surfaces
- Space saving storage with low form cylinder design

Azlon

The squat design makes these translucent polypropylene products more stable on the bench than traditional glass or plastic cylinders and results in fewer spills or more serious accidents. They are easier to handle, particularly in confined spaces such as fume hoods. The lower form means you require less overhead storage space. Not only are the graduations molded into the product, but they are also overprinted in attractive Azlon blue ink. And these cylinders have a unique self draining base that will allow wastewater to drain when inverted in a dishwasher - a first from Azlon!

Cylinder Polypropylene 4 Liter

- Calibrated TC/TD In 20°C +/- 50mL
- Height w Base: 23 1/2"
- Subdivisions: 50mL
- Weight: less than 11 lbs when full to 4 L
- Compliant with US FDA 21 CFR 177.1520 for use with Food and Beverage
- Compliant with ISO 6706

A 4 Liter translucent polypropylene Cylinder in a Squat Format with graduations marked in blue print. 50mL increments with 500mL graduation lines printed around circumference. Less than 24" in height with stable 8" diameter octagonal base. The base unscrews from cylinder for ease of cleaning and storage. Use for measuring large volumes, mixing and making up solutions and buffers. Complies with ISO 6706 and US FDA 21 CFR 177.1520 for use with Food and Beverage. Autoclavable (repeated autoclaving may affect accuracy).

Desiccator Cabinets Acrylic

For dry, dust-free storage at temperatures up to 120°F for use in incubators, freezers, refrigerators, or at room temperature. Cabinets have air-tight doors that need no lubrication. Sliding perforated shelves for easy access; transparent acrylic walls, for see-thru storage. A third bottom shelf accommodates desiccants.

Cabinets also available with locks and Hygrometer. Hygrometer has a temperature range of -58° to 158°F with +/-1.8°F accuracy up to 104°F. Humidity range is 20 to 95% with +/-5% accuracy. LCD display. Includes 2 AAA batteries. [Additional sizes available upon request.](#)

Nitrogen Purge Cabinet Acrylic

Simple, easy to use at temperatures up to 120°F for use in freezers, refrigerators, or at room temperature. Cabinets have air-tight doors that need no lubrication. Sliding perforated shelves for easy access; transparent acrylic walls, for see-thru storage.

Cabinets also available with Flow Meters. Direct reading scale flow meters with control valve let you not only measure flow through the meter, but also make flow adjustments in the line. Acrylic, ethylene polypropylene and Type 316 stainless steel wetted parts. Flow range: 2-20 scfh with accuracy of +/-6%. Flow meter dimensions: 2" scale height x 4 1/8" overall height with mounting centers of 3". [Additional sizes available upon request.](#)

Desiccator - Dippas™

Desiccator and Desiccator Plates

- Polycarbonate cover takes 8-10mm tubing
- Polypropylene base and plates

Unbreakable vacuum-desiccator holds a vacuum of 740 mm of mercury (29") for 24 hours. A neoprene "O" ring in groove of bottom section gives an excellent seal with upper section. The vacuum retention valve (not barbed) allows air to enter slowly to prevent damage to the samples inside. Removable pan holds calcium chloride or other drying agents and is non-corrosive.

Sterilin

Lipsol® Detergent, Concentrate

- Free of chlorine bleaches phosphate and enzyme free
- Suitable for laboratory medical and industrial applications
- Not suitable for use on non-ferrous metals especially aluminum or zinc
- Not suitable for use on polycarbonate

Azlon

With a cleaning performance second to none, Lipsol marks the arrival of the next generation of laboratory detergent. Lipsol is a non-corrosive, fully biodegradable liquid concentrate, suitable for use with all types of laboratory glassware, ceramics, plastics, rubber, stainless steel and ferrous metals. Lipsol is a highly alkaline mixture of detergent, surfactant and chelating agent suitable for removal of most types of contamination by soaking or use in an ultrasonic bath; **not for use in dishwasher.**

It's efficiency as a cleaning agent has been proved by extensive testing and then confirmed by field trials with users in a wide variety of applications and scientific disciplines. Lipsol is classified as a non-CORROSIVE. Free supporting independent test reports are available on request as is a MSDS.

Liquid Sampling & Stirring Kit, HDPE

- FDA Compliant HDPE
- Purchase individual components or as an entire kit
- Dipper kit includes 3 convenient handle lengths and 3 popular beaker capacities
- Stirrer kit includes 3 convenient handle lengths and two paddle heads
- Sampling kit includes 3 convenient handle lengths and 2 popular bottle capacities
- Mega kit includes 3 convenient handle lengths and all beaker, paddle and sampler options

Dynalon's new versatile modular liquid handling series fits all your needs. Whether sampling from drums or rail cars, stirring vats or dipping chemicals from a bath... we have the configuration to fill your requirements. Components are available piecemeal, as intuitive kits or buy the entire mega kit to cover all your bases. Interchangeable threaded components make using this product line quick, fun and easy!

Custom Plastic Fabrication

Dynalab Corp's Rochester, New York custom plastic fabrication facility manufactures many products for use in laboratories, industry and education including fume hoods, environmental chambers and laboratory furniture. Plastic fabricators have the capabilities to produce custom jobs following the exact requirements of your application. A few examples of our custom fabrication products include reservoirs, vitrines, tanks, fittings, machine guards, fume hoods, cabinets, chambers, gears, racks and thousands of other industrial and laboratory plastic fabrication items. We have extensive experience in clear acrylic fabrication a common material for custom plastic fabrication projects (especially for Beta Radiation Protection).

Our custom plastic fabrication facilities are capable of producing prototypes as well as high volume job runs. Custom plastic fabrication processes include: Assembly, Bending, Bonding, CNC Lathe Turning, CNC Machining, Cutting, Engraving, Flame Polishing, Forming, Hot Stamping, Inserting, Threading, Ultrasonic Welding and Welding.

We would be happy to provide you with a free quotation and any technical assistance you may require throughout your project. Dynalab works with virtually all types of plastics. We stock a large inventory of sheet, rod, tubing, extrusions, fittings, plastic hardware, perforated sheet, etc. E-mail our custom plastic fabrication department (labinfo@dyna-labware.com) for further information.

Bio-bin® Waste Disposal Containers

The ideal solution for biohazard or non-hazardous waste
REDUCE Cost, Weight, Transport, CO2 Emissions, Storage Space

- Space efficient, light weight fold-flat design
- Built-in lid and handles
- Temporary & permanent seals
- Stackable post use. UN 3291 Approved
- Printed user instructions & user ID/date information on lid
- Waterproof construction
- Built-in super absorbent Bio-matt™ to soak up any excess liquid in Bio-bin
- Autoclavable. Use with #202065 Autoclave Sterility Tape.
- Supplied with 2 x 2" Biohazard Waste Labels
- Reorder information printed on the Bio-bin

Disposal Box - Drying Rack

Drying Rack High Impact Polystyrene

Kartell

- Expandable, fasteners to connect additional racks included
- Interchangeable, removable pegs
- NEW Acrylic stand for our most popular drying rack

This 72 place drying rack is molded of high impact polystyrene. It comes supplied with 72 large pegs, draining tubes, fastening stoppers, and expansion hanging hooks which allow coupling with additional racks. The pegs are 4" long and the drip ledge measures 3".

Drying Rack Stand, Acrylic

Acrylic stand for our most popular drying rack! This sturdy stand is fabricated of 3/8" clear acrylic adding style and function to a normally wall mounted drying rack 259184-0000 shown above.

The 4.5 lb stand includes all hardware needed to attach to the drying rack. The rack can be tilted up to 20° for added stability and ease of use. Rack can be used vertically or tilted to 20° for added stability.

Drying Rack - Eye Wash Station

"MEGA PEG" Drying Boards, 36 Place PP

- Perfect for drying larger labware
- Drip tray with drain tube
- Supplied with 5" removable pegs with longer pegs available

Fabricated of 1/2" polypropylene, these drying racks are perfect for the high volume laboratory. Supplied in two standard sizes but can be fabricated to fit any space requirement. Each board is supplied with the appropriate number of 5" removable pegs with 8" and 12" pegs available as optional accessories. Shelves, holders and bins available on a custom basis. Mounting holes drilled upon request. [Additional sizes available upon request.](#) Please call our customer service department for a free quotation.

First EYD Station

Kartell

- Emergency eye wash station with integral eye wash bottle

This station is molded of high-impact green polystyrene complete with polyethylene eye wash bottle. The unique bottle is designed to allow quick and immediate flushing to remove foreign matters and help prevent serious eye damage. The head has an air-vent valve to assure air refill of free space in the bottle thus preventing drawback of contaminated wash into the bottle. A perforated spray plate in the eye-cup breaks up the stream to give the eye a gentle wash. A drain tube releases used fluid. Maximum comfort and ease of use. Capacity of bottle is 500 ml (16 oz.).

Discs for Buchner Funnels HDPE

Made from high density polyethylene, these discs have excellent chemical resistance. They are useful for holding up filter paper. In this way the blocking of the holes is avoided and the filtering surface of the funnel is free. Will withstand temperatures up to 110°C. Mesh size 950 x 700 microns.

Buchner Funnels PP

Kartell

Molded of polypropylene, these funnels are unbreakable and resistant to corrosion and heat, and easily separated for cleaning. Can be used without risk with Erlenmeyer flasks. Optional disks for funnels sold separately. Molded of polypropylene for corrosion resistance, withstands high temperature. No special flask is required.

Light in weight, more stable than glass or porcelain funnels. Can be taken apart for easy cleaning. The smallest size fits bottles with opening from 20 to 57 mm, medium size from 25 to 75 mm, largest size from 30 to 100 mm.

Gamma Protection Information

Gamma (g) rays are produced when an unstable isotope such as 125I enters into nuclear decay. This form of electromagnetic radiation is attenuated by lead. The gamma rays' intensity decreases exponentially as the thickness of the lead increases.

The recommended thickness of lead for use with 125I is 0.5mm, Dynalon uses 3mm lead for all of our g protection products. Other isotopes shielded by our products include 32P, 51CR, 35S, 33P, 3H and 14C. The enclosed boxes are perfect for short term storage of isotopes and contaminated labware. Dynalon gamma disposal boxes feature a polyethylene liner and a sleek black acrylic exterior.

All units come with non-skid feet and are available in additional sizes.

Funnel - Gamma Protection

172814-0001

172814-0002

Gamma and Beta Disposal Bins

3mm thick lead lining serves to attenuate both beta and gamma emitting radionuclides. Radioactive bins feature a polyethylene lining and a sleek black acrylic exterior. Two sizes are available.

Choose either our (172814-0001) 6" L x 10" H x 6" W pipette tip disposal bin or for larger serological pipettes choose from either the 172724 clear acrylic bin for beta emitters or the 3mm thick lead lined bin for gamma emitting radionuclides. Both are 6" L x 16" H x 6" W and will accommodate most glass and plastic pipettes.

All units feature a top hole for either tip ejection or pipette discarding; fully hinged lids for easy removal; and non-skid feet to provide stability. Order polyethylene bags for contamination-free disposal of tips or pipettes. All units come with non-skid feet and are available in additional sizes.

172814-0001	Gamma Pipette Tip Bin, 6" x 6" x 10"	\$485.15 each
172814-0002	Gamma Pipette Bin, 6" x 6" x 16"	\$535.33 each
172724-0000	Beta Pipette Bin, 6" x 6" x 16"	\$207.44 each

172814-0003 Gamma Desktop Bin, 6" x 6" x 6" \$407.36 each

Gamma & Beta items on this page are made in our Rochester, NY Fabrication shop and can be made to your project requirements.

Gamma Desktop Disposal Bin

General Purpose Gamma Desktop Bin. Dynalon gamma disposal boxes feature a polyethylene liner and a sleek black acrylic exterior. Product Dimensions (l x w x h): 6" x 6" x 6". All units come with non-skid feet and are available in additional sizes.

Glass Joint Sleeves - Imhoff Cone

Reusable PTFE Joint Sleeves

Unique manufacturing process permits superior quality PTFE joint sleeves at unbelievably low prices. Price permits disposability! Elongated cones of micro-thin virgin PTFE film tapered to fit snugly around glass joints. Approximately 0.05 mm (0.002") thick with taper of approximately 1.10 on diameter. Eliminates the need for lubrication and frozen, leaky ground joints. Can be used over a temperature range of -75° to +260° C.

quality . value . service

Close-it and Close-it Food - proven its value repeatedly

- With steam-lock for hermetically sealed closure
- No lumping of hygroscopic powders
- Closure seal that has proven its value repeatedly, even on dusty and slightly moist sacks
- Can be written on using a pen, pencil or felt tip pen
- Samples available

Taking samples from sacks, boxes, Big-Bags, etc. with sampling lances is a common and time-proven practice. This produces holes through which easily flowing bulk goods could escape from the container. Close-it prevents this in an uncomplicated manner.

Close-it has been specially developed for this purpose. The label has a sandwich-type structure (aluminum/paper) and seals the container hermetically (vapor barrier). This virtually prevents hygroscopic powders from clumping together. The label is not just used to provide a hermetic seal. It is also used for providing quality control information (sampling date, release yes/no, name of tester, etc.).

The label is available with printing in red and white. "Close-it" can be written on with ball-point pen, pencil or felt-tip marker.

The rear of the label is coated with a powerful adhesive so that "Close-it" sticks firmly to most commercial containers, even to surfaces coated with fine powder where conventional labels or adhesive tape will not adhere. "Close-it", the original, will even stick to slightly moist surfaces. The "Close-it" dispenser ensures safe storage and simple removal of the labels. A built-in marking plate allows the labels to be conveniently written on.

Close-it food is for use with foodstuffs. The adhesive on the label complies with European and FDA requirements for direct contact with dry, moist and fatty foodstuffs, European Directives 1935/2004/EU and 2011/10/EU and FDA 176.170 + 175.180 + 178.3620 + 178.3910. Just like the original, "Close-it food" has a barrier layer of aluminum foil.

This means that "Close-it food" is suitable for sampling foodstuffs, pharmaceuticals, cosmetics, food additives – in short, for all applications in which the product must not be contaminated by contact with the adhesive.

Supplied in the proven size of 95 x 95 mm in rolls each with 500 control seals or in 150 x 150 mm in rolls of 250 seals.

Label & Seals

Close-it Tape - for holes and tears in bags or sack like packaging

Available in rolls of 50 meters. Use "Standard" product for non food items such as chemical bags and use "Food" tape for food item packaging. The "Food" tape has an adhesive that is food compatible. Use on paper, burlap and other typically adhesive repellent surfaces.

Close-it Tape has an extremely strong adhesive strength and will stick to many diverse substrates. White in color with gridded dots for cutting, it can be labeled with permanent ink.

Use a small piece for closing a small hole or for marking a specific point. Or repair a large hole or a long tear quickly, reliably and easily. Supplied in the proven size of 95 x 95 mm in rolls each with 500 control seals or in 150 x 150 mm in rolls of 250 seals.

SampleSafe Seal PP - secures bottles and jars with eyelets

These seals are made of stable polypropylene and consist of a 270mm seal ring and a tab. The tab is uniquely identified with a serial 9 digit number. The seal ring diameter is 2mm, thin enough to fit through small eyelets and slits. The seal tab is secured by inserting the seal ring through the container eyelet and then through a one-way hole in the tab until it is pulled tight. The container is now Tamper evident. 2mm Diameter

853994-2902 SampleSafe Seal PP Red \$172.73 Pack of 100

Seal-it Security Seal - to seal retention sample containers and to tamper-proof packaging

Use Seal-it Security Seals with a unique identification number to tamper proof containers such as bottles, sample bags, sacks, specimen bags, envelopes etc. The powerful adhesive sticks to all conventional containers and the inherent aluminum foil adapts to any container shape. If manipulated, the cross perforations tear. Seal-it cannot be removed without being torn or destroyed, providing tamper evident proof! Product has a white labeling area for marking with all conventional writing tools: e.g. list contents, sampling date, names etc. An integrated control label with the same ID number can be applied to accompanying documents. Dimensions: 178mm x 30mm (l x w)

853994-0003 Seal-it Security Seals, Red \$236.72 Roll of 500

Tamper Proof Labels

Safe-it and **Secure-it** can be used as tamper evident security labels designed for sealing containers as well as letters, parcels etc. They provide a visual indicator of any tampering of critical samples. If removed, the label divides into separate layers. A hidden pattern then appears on the surface which is permanent. The glue also leaves a residue on the surface that cannot be removed. Dimensions: 95mm x 20mm (l x w).

Safe-it Tamper Proof Labels (left in above images): Breaking the security seal reveals visible proof of tampering. A silver checkerboard pattern appears on both the subsurface and surface of the sticker.

Secure-it Tamper Proof Labels (right in above images): Secure-it is similar to Safe-it but has a marking area for notes and comments. Like Safe-it, breaking the security seal of a Secure-it label reveals visible proof of tampering. A bright purple stop sign pattern appears on both the subsurface and surface of the label.

853033-5000 Safe-it Tamper Proof Labels \$162.97 Roll of 500
853033-5010 Secure-it Tamper Proof Labels \$245.56 Roll of 500

**BenchGuard™
"Totally Absorbing"**

BenchGuard and BenchGuard Extra have highly absorbent upper surfaces that contain spills and a tough polycoated base to protect your work surface. Standard BenchGuard absorbs up to 400ml per square meter. For your most demanding applications choose BenchGuard Extra - it absorbs up to 800ml per square meter. BenchGuard and BenchGuard Extra are available in either pre-cut sheets or a roll dispenser that has a built in cutting edge for easy cutting of any size sheet.

Ribbed Matting

- For lining shelves, drawers or use as a floor liner
- 5 times as thick as normal shelf/drawer liner
- Ribs hold dirt and spills

Clear polyethylene ribbed matting. Perfect floor liner goes down quickly and lies flat. Ribs hold dirt until it can be wiped away. As a shelf and drawer liner, heavy weight matting is five (5) times as thick as normal shelf liner. Easily cut with regular scissors but it won't tear! Also useful under drums or carboys. Heavy weight matting .036" thick with ribs.

Custom Plastic Fabrication

Dynalab Corp's Rochester, New York custom plastic fabrication facility manufactures many products for use in laboratories, industry and education including fume hoods, environmental chambers and laboratory furniture. Plastic fabricators have the capabilities to produce custom jobs following the exact requirements of your application. A few examples of our custom fabrication products include reservoirs, vitrines, tanks, fittings, machine guards, fume hoods, cabinets, chambers, gears, racks and thousands of other industrial and laboratory plastic fabrication items. We have extensive experience in clear acrylic fabrication a common material for custom plastic fabrication projects (especially for Beta Radiation Protection).

Our custom plastic fabrication facilities are capable of producing prototypes as well as high volume job runs. Custom plastic fabrication processes include: Assembly, Bending, Bonding, CNC Lathe Turning, CNC Machining, Cutting, Engraving, Flame Polishing, Forming, Hot Stamping, Inserting, Threading, Ultrasonic Welding and Welding.

We would be happy to provide you with a free quotation and any technical assistance you may require throughout your project. Dynalab works with virtually all types of plastics. We stock a large inventory of sheet, rod, tubing, extrusions, fittings, plastic hardware, perforated sheet, etc. E-mail our custom plastic fabrication department (labinfo@dyna-labware.com) for further information.

Melting Point - Paddle

NEW Design

Digital Melting Point Device

- Space saving compact design.
- Digital LED temperature display with 0.1°C resolution.
- 3 indicator lights (Heating, Fast, Slow) advising the procedure in process.
- Heating block with plastic cover to protect the user; cover is easily removed for cleaning.
- Magnifying lens that allows a view of up to two samples illuminated clearly by a built in LED light.
- Adjustable Slow Speed temperature ramp rate from 1°C to 10°C.
- Fast Stage temperature set that saves time prior to carrying out the melt procedure.
- Metal feet that extend and help provide an appropriate viewing angle.
- "Read" button that captures the melt temperature allowing for an accurate recording
- Self calibration screw

The Dynalon DMP100 Melting Point Device is a convenient, safe, fast and easy to use digital product that determines the melting point of a substance without the need for a mercury thermometer. The DMP100 makes measurement simple and is ideal for use in educational chemistry labs. It can be an indispensable bench top tool for the modern science education laboratory and for select industrial application areas such as quality control testing for the purity of pharmaceutical and other organic crystalline solids. Priced economically with a 3 year warranty.

The DMP100 includes an Operations Manual with detailed use instructions and one pack of 100 glass capillary tubes, open on one end.

Dimensions: 8.7 x 6.3 x 6.7" (l x w x h)

Petri Dishes
- now available in sleeves of 20 each!

All Sterilin petri dishes are manufactured under strict aseptic conditions within a Class J clean room which complies with BS 5295.

Petri dishes remain under clean room conditions throughout the manufacturing process. An in-house microbiology laboratory performs all the necessary testing, including that of sterility.

Sturdy polyethylene sleeves which exceed BS611 Part II are used to pack all Petri dishes. An inner liner compartments the carton and ensures that Petri dishes arrive in perfect condition. All cardboard used is of recycled grade.

Disposable Pipettes PS - now available in packs!

- Sterility guaranteed by gamma irradiation
- Excellent accuracy, better than $\pm 1\%$
- Crystal grade polystyrene for improved clarity
- Easy-open color-coded tear strips
- Ascending and descending graduations for accurate pipetting
- Drawn tips allow every drop to drain freely
- Special products manufactured to customer specifications

Crystal grade polystyrene is used for consistency in manufacture and maximum clarity, with easy to read crisp black printed graduations enabling the pipettes to be used accurately to $\pm 1\%$. Sterility is guaranteed by gamma radiation at a license holding irradiation plant, which follows the relevant recommendations in the DHSS Guide to Good Manufacturing Practice for Sterile Medical Devices and Surgical Products. Sterilin pipettes are tested for pyrogenicity, and have a pyrogen level of less than 0.25 EU/ml. ALL listed pipettes are individually wrapped.

MiniFIX Micropipettes

Kartell

- Good for ~5,000 pipettings
- Fixed volume from 5uL to 1000uL
- Cost effective, Autoclavable
- Ideal in schools for routine applications where speed and precision is required
- Color-coded button for easy volume identification
- Accommodates all common tips

This line of fixed volume mini-micropipettes consists of ten pipettes covering the range from 5 uL to 1000 uL. These pipettes feature a compact design, with a length of approximately 13cm, and weight of less than 10g. They are single blister packed, with calibration and performance certification. Each MiniFIX is marked with its volume, and the push button is color coded for easy "volume" identification.

Custom Plastic Fabrication

Dynalab Corp's Rochester, New York custom plastic fabrication facility manufactures many products for use in laboratories, industry and education including fume hoods, environmental chambers and laboratory furniture. Plastic fabricators have the capabilities to produce custom jobs following the exact requirements of your application. A few examples of our custom fabrication products include reservoirs, vitrines, tanks, fittings, machine guards, fume hoods, cabinets, chambers, gears, racks and thousands of other industrial and laboratory plastic fabrication items. We have extensive experience in clear acrylic fabrication a common material for custom plastic fabrication projects (especially for Beta Radiation Protection).

Our custom plastic fabrication facilities are capable of producing prototypes as well as high volume job runs. Custom plastic fabrication processes include: Assembly, Bending, Bonding, CNC Lathe Turning, CNC Machining, Cutting, Engraving, Flame Polishing, Forming, Hot Stamping, Inserting, Threading, Ultrasonic Welding and Welding.

We would be happy to provide you with a free quotation and any technical assistance you may require throughout your project. Dynalab works with virtually all types of plastics. We stock a large inventory of sheet, rod, tubing, extrusions, fittings, plastic hardware, perforated sheet, etc. E-mail our custom plastic fabrication department (labinfo@dyna-labware.com) for further information.

pi-pump® Fast Release

Kartell

Many years of trouble-free use have made the pi-pump® one of the world's most popular pipetting aids. Accurate, precise and safe—even for use with toxic or corrosive chemicals. Simply rotate the wheel forward or backward for easy and precise filling or emptying. Color-coded by size for easy identification. When the wheel is stopped, the piston remains in the required position and holds the liquid inside until ejected. pi-pump® provides a firm, positive fit for all standard pipettes.

NEW Mini Solvent Pump

Reliable filling of small quantities

The Mini Solvent Pump is a high-quality hand pump for use with liquids and flammable media such as acetone, ethanol, isopropanol and methanol. Use with small containers such as bottles, canisters, carboys and tanks with GL45 threads, from 1 liter up to ~ 10 liters in size.

Accessory thread adapters are available that allow this pump to fit on S40, GL38 & GL32 threads.

The pump works according to the excess pressure principle. Through use of the pump ball and the PTFE tubing, liquid is forced from the container due to the pressure build up. The pump includes a pressure relief valve for safety purposes.

Parts that come into contact with the media are stainless steel (1.4301 and 1.4404) and PTFE tubing cut to size; both have excellent chemical resistance. Also included is a grounding cable that easily inserts into the pump housing, for the purpose of diverting any electrostatic charges.

The Mini Solvent Pump is compact and very well balanced. Dosing of liquids occurs through the valve with an auto-stop function. It is very precise with no dripping even into small containers such as test tubes. Tubing can be attached to the discharge spout to fill containers at a further distance. The high quality materials ensure neat and reliable filling throughout a very long service life.

Mini Solvent Pump includes:

- PTFE tubing 0.4 meters
- Grounding cable, 2 meters
- Mini Solvent Pump SS/PTFE GL45

Pump, Water Jet Vacuum

The ideal instrument for generating vacuum and extracting liquids and vapors. The flow configuration has been optimized resulting in a reduction of water consumption to one third of customary values (190 Liters per hour at 3.5 bar water supply pressure). The maximum pressure of 16 m bar is reached across a wide range of water supply pressures (from 3 to 6 bar). The suction capacity is approximately 400 Liters per hour of air (against atmospheric pressure at a water supply pressure of 3.5 bar at 12°C).

Bench Top Splash Shield

- No eye-level distortion
- Extra wide top

Lower bend and wider top gives greater visibility of work surface and assures greater protection from splashes to face and neck area. The Splash Shield has been designed to be used comfortably either from a standing or sitting position. The gentle bend from the base allows the technician to observe the working surface from a comfortable sitting position. The lower area of the Shield is just 12" wide, thus making it easy to reach behind the Shield to pipette, open vials or perform any number of functions, while protecting the operator from being accidentally splashed. Fabricated from 1/4" clear acrylic for excellent stability. Non-skid feet. Available in other sizes by special order. 172284 Measurements: base—20" W x 12" D; face area—20" W x 15" H; overall—20" W x 12" D x 20" H. 172014 Measurements: base—12.8" W x 8.2" D; face area—20" W x 14.75" H. Not suitable for radiation protection.

Octagonal Color-Coded Stirring Bar Kit PTFE

Contains 24 color-coded octagonal and micro stirring bars designed to meet your requirements for a variety of sizes packed in a reusable box.

Kit contains (length x O.D.):

- (1) EA Yellow, Blue & Red 1 x 5/16" (26x8mm)
- (1) EA Yellow, Blue & Red 2 x 5/16" (51x8mm)
- (1) EA Yellow & Red 3 x 1/2" (76x13mm)
- (2) EA Yellow, Blue & Red 5/16 x 1/16" (8 x 1.5mm)
- (2) EA Blue & Red 1/4 x 1/16" (7x2mm)
- (2) EA Yellow, Blue & Red 3/8 x 1/8" (10x3mm)

Magnetic Stirrer, Non-Electric

Kartell

Unique stirrer, operated by water pressure between 15 and 40 psi, will work on air pressure as well. Stirs 500ml of water at 800 rpm with air at 8 psi or with water at 12 psi. Connects to pressure line with fitting supplied. No electric supply needed. All-plastic construction is corrosion-proof. No danger of explosion or shock. Can be used on a table or clamped to a stand with 1/2" diameter. Supplied complete with 6 ft. of vinyl tubing for inlet and outlet. Dimensions are 5" x 2 5/8" high.

DC Series DyNAcyclers

- DCL is perfect for Education or as a personal cycler
- DCR full sized workhorse
- Flexible block format
- Both come with a 4 year warranty
- Fast ramp times

DyNAcyler DCL: The Afon DCL 20, 25, 30 and 48 are designed with today's labs in mind. The user friendly programming can perform virtually any protocol, and the light weight and small footprint provide the lab with an essential yet compact unit.

DyNAcyler DCR: The Afon DCR60 and DCR96 are workhorses. The robust design, easy programming and 4 year warranty make this a high performance unit. Large, medium and small labs will find the DCR60 and 96 the perfect choice for the high demanding requirements of today's labs.

Visit www.dynalon.com for Thermal Cycler product specifications.

Wet/Dry Test Tube Racks PP

Kartell

- Solid High Density PP; Autoclavable at 121°C
- Will not rust or corrode makes epoxy-coated wire racks obsolete
- Supplied flat for economical storage and shipping
- Can be used dry or wet in waterbaths

These racks for tubes up to 13mm provide excellent stability with no tendency to float or move in circulating water baths. An alpha numeric grid reference on the top tier enables precise location in the rack of particular samples. Available in three colors for easy identification. Shipped flat, easily and permanently snapped together to save shipping expense and reduce shelf space needed in storerooms.

- General: Meets or exceeds the requirements listed in ASTM D 3296-03
- Temperature: -100°F to 400°F
- Flammability: UL 94 VO rated. FEP resists combustion and does not promote flame spread
- FDA: FEP is approved for use in food contact applications in compliance with FDA regulation: 21 CFR 177.1550.
- USP CLASS VI: Altafluor 200 meets the requirements of USP Class VI

Tubing FEP Fluoropolymer

- 100% Virgin grade high performance resins used to resist stress cracking
- Chemically inert to most industrial chemicals and solvents
- High thermal stability
- Low permeability
- FDA compliant for food contact
- Superior electrical insulation properties
- Excellent UV transmission
- Moisture absorption nearly 0
- Non-flammable

FEP (fluorinated ethylene propylene) is an economical choice for applications requiring chemical resistance in combination with broad temperature exposure. ALTAFLUOR 200™ FEP offers excellent clarity which makes it ideal for sight glass/flow monitoring applications. Additionally, the outstanding UV transmission rate of FEP makes it a clear choice for UV transmission applications. ALTAFLUOR 200™ tubing may be used with flare or conventional fittings. Additional sizes and heavy duty product available upon request.

Tubing - Tubing Accessories

ESCO

ESCO Medical Grade Tubing

- High quality non-toxic silicone tubing or medical, pharmaceutical and food applications
- Peroxide-cured tubing
- Full traceability via batch code information discretely laser etched along full length of tubing

- Tamper evident labeling on outer box
- Suitable for use with peristaltic pumps
- Suitable for autoclaving or dry heat sterilization
- Manufactured under clean room (Class 7) conditions
- Available in a wide variety of bore sizes and wall thickness
- Supplied in 15 Meter (49.21') coils*

Certification:

Check Valve PP

Kartell

Valve prevents the Reverse flow of the liquid when the pressure is interrupted. Useful for any tubing system on vacuum line. Regular size valve will fit tubing 8-9-10 mm (1/4" to 3/8") diameter depending on elasticity. Large size valve will fit tubing 12-13-15 mm (7/16" to 5/8") diameter. Will withstand temperatures up to 100° C.

One Position Clamp PP

This unique open/close, single position design allows for positive on/off flow control. The clamp design features easy tube insertion for both manual and automatic operations. Molded of polypropylene suitable for ETO sterilization and is stocked in white. Accepts approximately 1/4" to 1/2" OD tubing.

670705

\$25.52 pack of 100

Flow Indicator, SAN

This flow indicator is transparent, leakproof, ultrasonically molded and fitted with a polypropylene ball. It allows an immediate visual indication of gas or liquid flow by means of the ball's rotation. The speed of the ball's rotation is dependent upon the flow of velocity. Can be used to connect tubing with different diameters from 6.5 to 10 mm (1/4" to 3/8" I.D.). For liquid flow from 50 mL/min. in horizontal position and 140mL/min. in vertical position. Minimum air flow detected is 3 liters/min. horizontal and 8 liters/min vertical. Maximum fluid temperature is 122° F (50° C).

227155

\$106.36 pack of 5

Kartell

Flow Indicator, Paddlewheel, SAN

This bright red paddlewheel indicates liquid or gas flow from 5 ml/sec to 95 ml/sec. The clear outer case allows for unobstructed view of the wheel which spins freely with flow. Not for use with corrosive fluids or temperature over 185° F (85° C). Can be used to connect tubing I.D. of 3/8" to 9/16" (10-14 mm) I.D.

227145

Vial Rack - Water Still

Water Still, Merit

- Economical Price
- Glass construction with long life metal heating element
- Two independent safety thermostats
- Wall mountable

The Merit is the ideal choice for budget conscious laboratories that can't afford to compromise on quality. It combines economy and high performance with a host of other features which comparable stills cannot match. Built in acid addition funnel and drain stopcock allow easy descaling without dismantling the glassware.

The unique condenser design ensures that the droplets of distilled water remain in contact with the cooling coil for the longest possible time producing cold distilled water and pre-heating the boiler feed to increase efficiency. Screw threads are incorporated on all water connections so hoses can be fitted and removed easily and safely without risk of breakage. Safety features include two independent safety thermostats to prevent over heating in the event of failure of the water supply. The stand is pre-drilled to facilitate wall mounting.

Output	4 liters/hr, single distilled
pH	5.0 – 6.5
Conductivity, µScm-1	3.0 – 4.0
Resistivity, mOhm-cm	0.25 – 0.3
Temperature	25 - 35°C

Water supply	1 liter/min
	3 – 100psi (20-700kPa)
Electricity supply (single phase)	220/240V, 50-60Hz
Power requirement	3kW
Net weight	25lbs
Dimensions, (w x d x h), mm	500 x 150 x 450
	19.7" x 5.9" x 17.7"

* Care is required to produce pyrogen free water and the output should be tested before use.

540004-0000	Merit Water Still, 220/240V	\$1,857.17 each
540014-0001	Replacement 220V Heater element 3kW	\$740.00 each
540014-0002	Replacement boiler	\$697.50 each
540014-0003	Replacement condenser	\$647.00 each
540014-0005	Gasket Kit For Water Stills	\$130.00 each

The results above confirm that the distilled water from our Merit Water Still conforms to Grade 3 water as detailed in ISO 1696: 1987.

*pH, conductivity and sensitivity are affected by temperature and the presence of absorbed carbon dioxide. The basis of the tests is 20°C on distilled water free of carbon dioxide.

**Care is needed to obtain Pyrogen-free water, and the distillate must be tested before use.

Weighing Bottle - Wipe

Weighing Bottles PP with PP Lids

- Autoclavable, reusable translucent bottles
- Airtight, push on lids included
- No internal shoulder eliminates need for spatulas
- For liquids or solids

Reduce the tare weight correction with these light weight, autoclavable, reusable translucent bottles. Highly resistant to acid attack. Tops can be squeezed to assist pouring. Remove lid before autoclaving. Very economical compared to glass.

Adept® Paper Wipers

- Low Particulate, non-streak cleaning
- Extra Absorbency Performance
- Sensitive and Delicate parts wiping
- Anti-static cover

Adept@Wipes...ideal for wiping applications requiring clean, delicate, low-lint performance. Soft, non-abrasive, low lint virgin tissue wipes are available in both 1-ply and 3-ply strengths. Efficient wipe sizes in attractive usage-control dispenser boxes with lint-reducing, anti-static film covers.

Tuff-Job® Scrim Reinforced Wipers

- Multiple plies for more absorbency
- Superior wipe dry
- Low lint
- 100% recycled
- Polyester scrim webbing for extra strength & durability

Tuff-Job scrim reinforced wipers are the better choice for all-purpose wiping jobs where extra durability is needed; yet, cost effective. These wipers provide the best wipe-dry performance of any comparable disposable wiper, especially for glass and other smooth surfaces. Works well in grease and oil, too!

Wipe - Wipe Holder

Like-Rags®

- Multiple plies for more absorbency
- Superior wipe dry
- Low lint
- 100% recycled
- Polyester scrim webbing for extra strength & durability

High performance nonwoven towel ...Like-Rags® are designed for durability, strength, and absorbency. Ideal replacements for rental shop towels and rags. Like-Rags® can be used in all cleaning and wiping situations—heavy duty machine & part cleaning, polishing or bondo removal along with adhesive cleaning.

Like-Rags are the ideal choice for applications that require resistance to solvents and virtually lint free wiping—applying aircraft solvents, wiping down print presses or plates and solvents for furniture stains. Like-Rags® eliminate the waste and cost guess work associated with industrial rags. They allow you to control costs through consistent case count, size and quality. Re-usability and durability add up to a very cost effective, value added product line!

Golden Dusters

- Unique stretch design
- Treated to attract dust
- Strong, Soft and Durable
- Low Linting
- Specially designed pockets to catch dust and dirt
- Convenient twist-tie polybags

Golden Dusters are the perfect choice for multi-purpose dusting applications. Both towels contain a unique structure that is designed to be stretched before dusting, creating tiny dust catching pockets. Towels are specially treated to collect maximum amounts of dust without leaving any hazardous residue behind.

Dusterz® Floor Cloth

- Superior dust / dirt pickup and retention
- Strong Fabric –Greater stretchability
- Leaves no oily residue
- Available in two sizes: Hand & Floor dusters
- Anti-static properties—helps to neutralize static electricity

Dusterz®—dry, pretreated anti-static dusting and cleaning cloths. Cloths are oil and silicone free, which means no oily residue left behind to stain documents, streak polished surfaces or create slippery spots on floors. Dry pretreatment reduces the use of aerosol, liquid cleaners and chemicals which helps reduce dusting and cleaning time.

Custom Plastic Fabrication

MADE IN

U. S. A.

Dynalon's plastic fabrication department fabricates many **laboratory products** in this catalog. Stock products ranging from our extensive line of desiccators on page 49 to the often customized spill containment trays on page 93.

We have the capabilities to produce custom jobs following the exact requirements of your application.

A few examples of our custom laboratory jobs include trays of all sizes, tanks, fume hoods, cabinets, chambers, racks and thousands of other plastic items.

We are capable of producing prototypes as well as high volume job runs. We would be happy to provide you with a **free quotation** and any technical assistance you may require throughout your project.

Dynalon works with virtually all types of plastics. We stock a large inventory of sheet, rod, tubing, extrusions, fittings, plastic hardware, perforated sheet, etc...

Please telephone our customer service department at 800-334-7585 for more information.

Custom fabricated of perforated HDPE **dipping basket** was used for coating a lens in the Hubble Telescope.
Unit dimensions: 6' long x 3' wide x 4' deep

Custom fabricated fully functional **laboratory sink** was made to the strict dimensions and requirements of our customer.
Unit dimensions: 6' tall x 5.5' wide x 2.5' deep

**Volumetric Flasks
with Stoppers, PMP**
